Get connected

Seamlessly connect your office technology and infrastructure with a SMART Board interactive display. Bring together your standalone devices, computers and peripherals, digital tools and content, so they're used to their fullest potential.

Connect devices for active collaboration

Share screens and send ideas to the display with native, browser-based and app-based screen sharing. The **SMART Mirror app** for Windows and Mac OS enables screen sharing without prior network configuration and includes touchback support. Plus, **share live whiteboard sessions** with two-way annotation to standalone devices. Works both in and out of the workspace through any Internet browser, no login required.

Bigger, better video conferencing

The SMART 6000S Pro series works with UVC webcams, Zoom, Microsoft Teams™ and Google Meet™. An integrated microphone array offers presenters the freedom to move around the room while maintaining consistently outstanding audio. Enhance shared screen content in these applications with spotlights and digital ink that help communicate ideas and focus participants' attention.

Interact with every input

Plug in multiple computers and video inputs and switch between them easily and intelligently with live input preview. Plus, easily connect any device to the 65-watt USB-C ports for video, audio, touch, data and charging with only one cable.

Get simple

SMART's exclusive walk-up-and-use touch and ink experiences make the 6000S Pro display the easiest interactive display for first-time and occasional users. Its low learning curve and intuitive features allow everyone to connect and interact with no training needed. With unmatched quality and exceptional privacy and security, it's the ideal choice for any business environment.

Better touch and ink experiences

Featuring up to 40 unique points of touch on Windows computers, 20 on Mac computers, 20 on iQ embedded Android and Object Awareness to detect touch, pens and palms automatically. Plus, only SMART enables multiple users to write, erase, touch and gesture at the same time, without toolbars or menu selections and without interfering with another user's tool choices.

Easier to maintain

We put in the effort, so you don't have to. The SMART 6000S Pro series display provides **FREE** automatic over-the-air updates to both Android and product features, and can be easily managed at scale with SMART Remote Management software*.

Backed by SMART Assure warranty (region dependent), which includes expert technical support, advanced hardware replacement with two-way shipping, and onsite RMA support.

*Subscription for length of included product warranty term

Get engaging

Keep participants engaged, remotely, in-person or in a flexible work environment to improve information retention, meeting outcomes and employee productivity with the SMART 6000S Pro series interactive display.

Work in an unbound workspace

Don't bother erasing. Just keep working. SMART Meeting Pro lets teams capture ideas in the virtually unlimited interactive workspace that expands as colleagues add images, files, links and notes—even over multiple displays and meetings—for enhanced collaboration.

Ink anywhere

SMART Ink desktop software lets you write into and over web browsers and applications, including PDFs and Microsoft Office files, then save notes in almost any file type.

Exceptional embedded experience - powered by iQ

SMART 6000S Pro series with iQ puts everything you need in one place. iQ is an integrated Android-based experience; a platform purpose-designed to be easy to use for users, regardless of technology comfort level. iQ gives users an easier, more powerful and more accessible way to engage and collaborate in a remote, in-person or hybrid office environment. The embedded computer offers one-click access to SMART software applications and collaboration tools including a whiteboard, web browser and wireless screen sharing.

SMART Mirror screen share provides native (Google Cast on Android™ and AirPlay on iOS®), browser-based and app-based screen sharing. The Windows and Mac OS app enables screen sharing without prior network configuration and includes touchback support.

Windows and Mac OS experience

Enjoy the full SMART Board experience on any connected Windows (40 points of touch) or Mac (20 points of touch) computer. Get precision interaction and natural intuitive touch and ink, with SMART Ink, Object Awareness and Simultaneous Tool Differentiation across web browsers and applications.

Optional SMART OPS PC Module

Add a SMART OPS PC Module for an all-in-one, cable-free Windows experience. The OPS PC allows for a simple, standardized deployment in organizations, and provides ease of mobility and flexible use for your display.

Built to last

The SMART Board 6000S Pro series meets world-leading standards for quality, safety, environmental and regulatory compliance, using third-party verification, and backed by technical support services and SMART Assure warranty coverage (region dependent). It also comes with a subscription to SMART Remote Management software.*
